

Capabilities Statement

Ark is a leading provider of data analytics, cloud, and application development services to federal and state clients. We provide end-to-end solutions in application development, consulting, and re-engineering across all major technologies.

Past Performances

Project & Program Management:

Provided PPM support to the Department of Health and Human Services and the National Disaster Medical System (NDMS) to create a nationwide IT application and infrastructure deployment.

Cloud Migration & Architecture:

Designed, built, and supported extensive, secure AWS Cloud infrastructure. Supported mission-critical applications in supporting emergency responders for the Assistant Secretary for Preparedness and Response (DHHS/ASPR).

Electronic Records Management:

Implemented solutions to comply with NARA records management requirements for multiple agencies. Extensive experience implementing records management, disposition schedules, and record retention methodologies for agencies' electronic records.

Data Analytics / Power BI:

Ark performed key data analytics and data engineering work as part of The Data Initiative Team at HHS/OCIO. Technology tools used: Power BI, Python with Jupyter Notebooks, Pandas, Geo Pandas, PowerShell Scripts, and MySQL

Office365 / SharePoint / Power Apps:

Ark has over 12 years of experience delivering Microsoft SharePoint-based application development support to various agencies including HHS, NIDCR, NHLBI, ASPR, NIH/CIT, and other agencies. Helped DHS/ASPR to migrate to Office365 cloud and build PowerBI-based business intelligence tools. We implemented a Qlik-based BI dashboard for the State of Maryland – MDTHINK project.
